PROFILE

I'm a full-stack developer with experience building web applications and APIs. I specialize in JavaScript, Symfony, Angular, PHP and Flutter programming language. I prefer working in a motivating team and on challenging projects.

WORK EXPERIENCE

Internship in Tunisia Telecom web development

June 2023 - July 2023

- During my internship at Tunisie Telecom, I developed a dynamic website dedicated to managing and connecting partner physicians with the company. This project allowed me to put my web development skills (HTML, CSS, PHP, MySQL) into practice while addressing a concrete need for data management and streamlined communication. I worked on user interface design, database integration, and secure access, while respecting professional standards and the client's specific needs.

Internship in Hammamet internet service PFE

June 2021 - July 2021

- As part of my advanced learning of the Symfony framework, I designed and developed a restaurant management web application. This project allowed for the management of menus, customer orders, table reservations, and staff. Using Symfony and a MySQL database, I implemented a secure authentication system, an administration interface for managing dishes and schedules, as well as an interactive customer area. This project allowed me to strengthen my skills in MVC architecture, entity management with Doctrine ORM, and the development of robust and efficient web applications.

EDUCATION

Certification : artificial intelligence

HP LIFE online course: AI for Beginners!

Online Courses
juin 2025

Diplome en Science Informatique, spécialité Développement Web et mobile

Elite Private formation

Nabeul, Tunisia
october 2025 - july 2025

Certification : Business English

Higher institute of language in Nabeul

Nabeul, Tunisia
october 2021 - july 2022

Certification : French History

Higher institute of language in Nabeul

Nabeul, Tunisia
october 2019 - july 2020

LANGUAGE

Arabic : Native Language

French: Advanced

English : Advanced

SKILLS

- Architecture: MVC
- Operating System: Windows
- Framework: Node.js, Express.js, WordPress
- Version Control: GitHub
- Programming Languages: PHP, JavaScript, JAVA, Symfony, Angular, Python, PHP, HTML5
- Mobile: Flutter, Dart
- Database: MySql

PROJECTS

- **Resto-Luxe**
freelance

Technologies: Flutter

I recently developed a restaurant app using Flutter, designed to provide a seamless and engaging experience for food lovers. This project emphasizes a clear separation of concerns, using reusable widgets for consistent UI components and a dedicated theming system for colors and text styles. Designed with scalability in mind, the app supports multiple platforms, including Android, iOS, web, and desktop, making it a versatile solution for restaurant businesses looking to enhance their digital presence.

- **Habilux**

End of study project

Technologies: Symfony

I recently created a dynamic real estate agency called Habilux, developed with Symfony, aiming to provide a seamless and engaging experience for buyers and sellers of real estate. Our site features: Modern and intuitive interface: Users discover a personalized homepage with search options tailored to their needs. Advanced search functionality: An efficient search bar makes it easy to find properties based on various criteria. Optimized navigation: A clear navigation menu facilitates access to the Home, Properties, Services, and Contact sections. Dynamic property showcase: Property lists with filters for property types—houses, apartments, land—accompanied by attractive photos and detailed descriptions.

- **Doctors with Tunisie telecom**

End of year project

Technologies: PHP

As part of my web development skills, I designed and developed a dynamic website dedicated to hospital management using HTML, CSS, JavaScript, and PHP. The system allowed for the management of patients, appointments, medical staff, and hospital services. I implemented a user-friendly interface, a secure login system, and a relational database to centralize information. This project allowed me to strengthen my skills in full-stack development, medical data organization, and the creation of solutions adapted to the needs of the healthcare sector.

FORCES

Creativity:

Generate innovative ideas that significantly improve the company's overall performance.

Team Collaboration:

Enjoys working in a collaborative and motivating team environment; values collective problem-solving and code review culture.
